

INSURANCE GUIDELINES

If your insurance company requires a referral for specialist care, we must have it before you are seen by the physician. If you do not have the required referral at the time of your visit, you may either reschedule your appointment or by signing this waiver you will be responsible for the entire amount.

If you change your primary care physician (PCP) during your medical treatment with the Cardiology Center of Englewood please notify our office so the proper referral may be obtained.

I have read and understand the above statements and agree.
